ASK IN NATURAL LANGUAGE
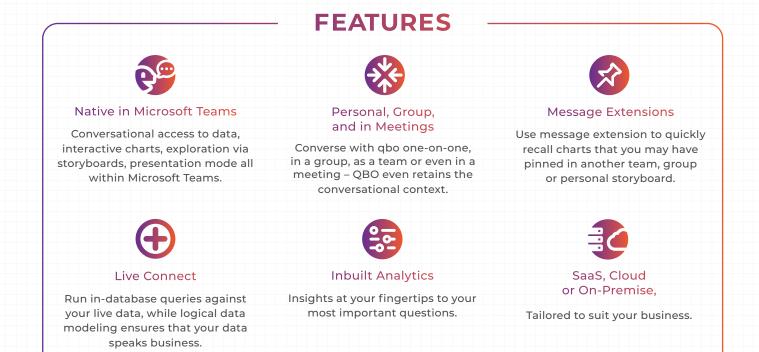

UNSCRAMBL

Connect Converse Collaborate.

qbo

Converse with your data

Ask data questions using **natural** language,and get answers in beautifully formatted charts and insights that speak the language of your **business**. Iteratively refine any query and empower decision makers to access and unlock the power of data.

Deep domain specific insights

Stop missing out on opportunities and insights to make a difference to your business. Let our advanced analytics and data science algorithms help you discover serendipitous insights on the most relevant metrics and segments that matter to your business.

FEATURES

Native in Microsoft Teams

Conversational access to data, interactive charts, exploration via storyboards, presentation mode all within Microsoft Teams.

Personal, Group, and in Meetings

Converse with qbo one-on-one, in a group, as a team or even in a meeting – QBO even retains the conversational context.

Message Extensions

Use message extension to quickly recall charts that you may have pinned in another team, group or personal storyboard.

Live Connect

Run in-database queries against your live data, while logical data modeling ensures that your data speaks business.

Inbuilt Analytics

Insights at your fingertips to your most important questions.

SaaS, Cloud or On-Premise,

Tailored to suit your business.
